

Change Log for Package FrF2

Status: 20 December 2007

Version 0.7, 20-Dec-07

Bug-fix: functions DanielPlot and IAPlot did not work with aov objects but only with pure lm-objects. This has been fixed by letting the internal function remodel transform aov objects into pure lm objects.

Version 0.6, 16-Dec-07

Eliminated portability issue with example: Version 0.5 used windows() for opening several graphics devices.

First version on CRAN: Version 0.5, 15-Dec-07
